

Vehicle: Nissan Patrol GU 3lt / 4.2lt Diesel  
Year Model: 1998-2013  
Product: Auxiliary Battery Tray  
Product Code: BT037

Fits up to N70zz 12 inch case battery

1. Battery tray fits into the front left hand passenger side of the vehicle under the bonnet. A rubber hose is held by a plastic clip in this area. It needs to be unclipped turned and faced towards firewall, and clipped back in to move the hose towards the firewall (to allow adequate room for installation of the tray).

2. Sit battery tray into position. The tray has a support leg under the tray towards the engine and four more mounting points. Fit all 5 x 4mm bolts & tighten.

*Please ensure there are no relays or aftermarket fuel fitters in the way prior to fitment.*

3. The tray also has a heat shield that bolts to the tray using 4mm bolts & nuts. This is to be installed after the tray base is in position and all bolts are tightened.

4. Once the battery has been placed in the tray with hold down fitted, there is a support bracket that bolts to the guard & fixes to the hold down bracket. **Please ensure this support is installed. Failure to install may result in cracking of the guard inner.**

**Comes complete with:**  
4 x 4mm bolts & nuts for heat shield  
5 x 4mm bolts  
1 x support bracket  
1 x hold down with J hooks
