SERIOUSLY STRONG SOFT SHACKLES

Tested at a NATA accredited facility in Melbourne, Saber Offroad shackles perform at a superior level compared to many other tested competitor products.

Shackles manufactured with our exclusive SaberPro® Fiber offer the highest standards in strength and durability, they won't let you down.

The HDX range of shackles build upon the SaberPro® fibre with improved abrasion resistance, truly cut resistant protection and higher breaking strength thanks to the Technora binding.

SOFT SHACKLES

CARE INSTRUCTIONS
Always thoroughly clean your soft shackle with a gentle detergent. Shackles must be rinsed well and allowed to dry before further use. Residual abrasives such as dirt, sand and other matter can damage rope fibres. To protect the integrity of the rope and it's tested breaking strain, avoid kinking or tying additional knots in the shackle.
WARNING
Before and after use, check the full length of the soft shackle for any cuts, abrasions or fraying. If damaged, the soft shackle should not be used.
ALWAYS INSPECT THOROUGHLY BEFORE USE
DO NOT USE IF DAMAGED IN ANY WAY
AVOID CONTACT WITH SHARP EDGES
AVOID CONTACT WITH HOT SURFACES
