

THE ULTIMATE NUDGE BAR

TO SUIT NISSAN Y62 PATROL

(2019 - ON, Series 5 - Ti)

Models: Ti & Warrior variants

Lightweight, form-fitting protection.

Proudly Designed, Engineered and Manufactured in Boronia, Victoria, Australia.

Warrior image shown

The Ultimate Nudge Bar is a fresh look at lightweight protection for the front of a vehicle. Its sturdy mounting systems and unique frame help protect vital components like the radiator in the event of an accident while also providing the perfect mounting solution for adding accessories like antennas and driving lights.

Each bar is engineered to integrate an Ultimate9 LED Light Bar, providing exceptional visibility at night.

With safety in mind, the bars integrate with your vehicle's safety systems, such as radars, parking sensors, and forward-facing cameras, ensuring compliance with Australian Design Rules (ADR) and preventing interference with these essential driver aids.

Ti Design

The Ti nudge bar preserves the operation of the front radar, camera and parking sensors.

Parking (PDC) sensor functionality is retained by relocating the sensors into the uprights with the necessary extension looms, holders, and blanking plates supplied.

Form Fitting

The uprights are laser-cut to match the profile of the bumper once folded, creating a snug fit with minimal forward projection.

Light Weight

The Ultimate Nudge Bar is remarkably lightweight, averaging only 25 kilograms and having minimal impact on the front suspension.

Construction

The bar's unique frame is press-folded in-house using a 135-ton, 7-axis CNC press brake.

The main frame uses 3mm steel, and the centre pan is 1.6mm steel with a laser-cut Ultimate9 logo. Thicker 6mm steel is used for the chassis mounts, engineered to align with factory bolt holes to eliminate drilling and provide a solid & secure fit.

Corrosion Protection

Raw assembled bars & mounting brackets undergo a zinc plating process to form a protective barrier against rust & corrosion.

For added durability and aesthetic appeal, zinc-plated bars are powder-coated. This finish enhances the bar's resistance to wear and tear while providing an extra layer of corrosion protection.

Light Bar Specs:

- Input Power: 9-36V
- Beam Pattern: Flood & Spot Combination
- Beam Spread: 8° Spot & 20° Flood
- Power: 150W
- Current Draw: 10A @ 13.2V
- Raw Lumen: 14,280 lm
- Effective Lumen: 7,135 lm
- Beam @ 1 Lux: 582m
- LED Chips: Osram 5W
- Colour Temp: 6000-6500K
- Housing Material: 6063 Aluminium
- Housing Coating: DuPont®
- Lens Material: GE Lexan® Polycarbonate
- IP Rating: IP68 / IP69K
- Ventilation: Gore® PolyVent

INCLUDED: 30" LED LIGHT BAR

- Weight: 2.37Kg
- Body Dimensions: (L)812 x (H)45 x (W)49mm
- Lens Dimensions: 30" (811mm)
- Connector Type: DT Sealed
- Operating Temp: -40°C - 145°C
- Certification: CE, RoHS, RCM

Light Bar Adjustment

The tilt of the light bar is easily adjusted through holes on the sides of the nudge bar.

High-Beam Pickup

Our High-Beam piggyback adapter with OE-style plugs is supplied to allow for easy light integration.

The adaptor plugs directly into the headlight loom to control the Light Bar to come on only when high beams are engaged.

OME Style Light Bar Switch

An LED Ultimate9 etched OE-style factory switch keeps with the vehicle's aesthetics. There is also the choice of a small round Ultimate9 rocker switch in the wiring harness assembly.

The OE-styled switch fits into the dash without modification.

Wiring Harness

Our Ultimate9 Auxiliary Loom with twin outputs provides plug & play fitment for the included Light Bar with industry-standard, waterproof DT connectors. It is also able to connect an additional Ultimate9 LED Light Bar.

Additional Lighting

There is provision to mount a 26-inch on top and a 20-inch below the included LED Light Bar with pre-laser-cut slots.

1. 26-inch LED Light Bar
2. 20-inch LED Light Bar

Lighting Notes

If fitting three Light Bars, another Ultimate9 twin output wiring harness will be required.

Fitment

Nudge bars include comprehensive step-by-step instructions to make fitment easy for both professional and DIY installers, containing visual diagrams for each step.

Fitment Notes

When fitting the bar, two vertical slots are cut from the bumper to allow the mounts to protrude.

Hardware

Nudge bar kits include stainless steel & zinc-plated high-tensile bolts, nuts and washers for installation.

Additional:

- PDC Sensor extensions, sensors & holders.

Packaging

To ensure the nudge bar reaches the end customer in perfect condition, we use custom-designed boxes for each bar to prevent rubbing and transport damage.
