

THE ULTIMATE NUDGE BAR

TO SUIT VOLKSWAGEN AMAROK

2022 - ON (NF, 2nd Gen)

Lightweight, form-fitting protection.

Proudly Designed, Engineered and Manufactured in Boronia, Victoria, Australia.

PanAmericana image shown

The Ultimate Nudge Bar is a fresh look at lightweight protection for the front of a vehicle. Its sturdy mounting systems and unique frame help protect vital components like the radiator in the event of an accident while also providing the perfect mounting solution for adding accessories like antennas and driving lights.

Each bar is engineered to integrate an Ultimate9 LED Light Bar, providing exceptional visibility at night.

With safety in mind, the bars integrate with your vehicle's safety systems, such as radars, parking sensors, and forward-facing cameras, ensuring compliance with Australian Design Rules (ADR) and preventing interference with these essential driver aids.

Amarok Design

The Amarok Nudge Bar preserves the operation of the front radar, camera and parking sensors.

Parking (PDC) sensor functionality is retained by relocating the sensors into the uprights with the necessary extension looms, holders, and blanking plates supplied.

Form Fitting

The uprights are laser-cut to match the profile of the bumper once folded, creating a snug fit with minimal forward projection.

Light Weight

The Ultimate Nudge Bar is remarkably lightweight, averaging only 25 kilograms and having minimal impact on the front suspension.

Construction

The bar's unique frame is press-folded in-house using a 135-ton, 7-axis CNC press brake.

The main frame uses 3mm steel, and the centre pan is 1.6mm steel with a laser-cut Ultimate9 logo. Thicker 6mm steel is used for the chassis mounts, engineered to align with factory bolt holes to eliminate drilling and provide a solid & secure fit.

Corrosion Protection

Raw assembled bars & mounting brackets undergo a zinc plating process to form a protective barrier against rust & corrosion.

For added durability and aesthetic appeal, zinc-plated bars are powder-coated. This finish enhances the bar's resistance to wear and tear while providing an extra layer of corrosion protection.

Generic image shown

Integrated Light Bar

The Amarok nudge bar integrates a 30-inch LED Light Bar into the top channel.

Light Bar Specs:

- Input Power: 9-36V
- Beam Pattern: Flood & Spot Combination
- Beam Spread: 8° Spot & 20° Flood
- Power: 150W
- Current Draw: 10A @ 13.2V
- Raw Lumen: 14,280 lm
- Effective Lumen: 7,135 lm
- Beam @ 1 Lux: 582m
- LED Chips: Osram 5W
- Colour Temp: 6000-6500K
- Housing Material: 6063 Aluminium
- Housing Coating: DuPont®
- Lens Material: GE Lexan® Polycarbonate
- IP Rating: IP68 / IP69K

INCLUDED: 30" LED LIGHT BAR

- Ventilation: Gore® PolyVent
- Weight: 2.37Kg
- Body Dimensions: (L)812 x (H)45 x (W)49mm
- Lens Dimensions: 30" (811mm)
- Connector Type: DT Sealed
- Operating Temp: -40°C - 145°C
- Certification: CE, RoHS, RCM

Light Bar Adjustment

The tilt of the light bar is easily adjusted through holes on the sides of the nudge bar.

High-Beam Pickup - ULTLEDPH06

(LED Reflector Headlight)

A high-beam pick harness & WAGO connector is supplied and will connect to a pre-terminated 'High Beam' wire.

Suits models with standard LED Reflector Headlights.

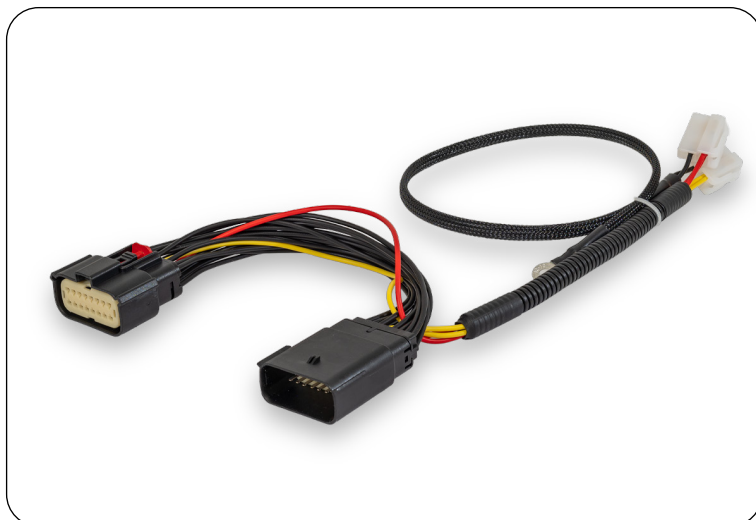

High-Beam Pickup - ULTLEDPH08

(IQ.Light LED Matrix Headlight)

Our High-Beam piggyback adapter with OE-style plugs is supplied to allow for easy light integration.

The adapter plugs directly into the headlight loom to control the Light Bar to come on only when high beams are engaged.

Suits models with IQ.Light LED Matrix Headlights.

Fitment Notes

The Amarok Nudge Bar includes both of the above High-Beam pickup's to cater for either headlight variation.

Wiring Harness

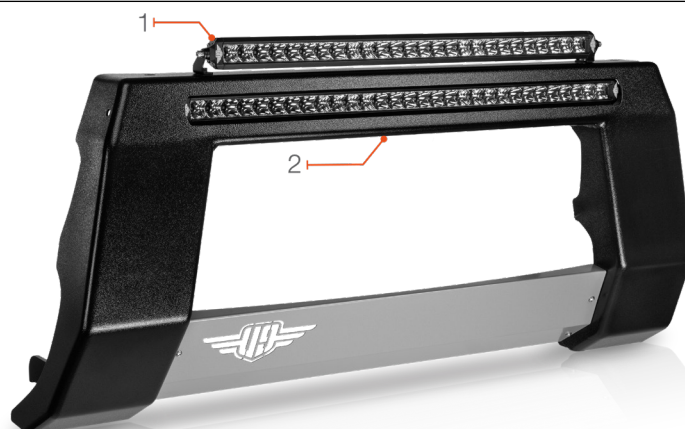

The Ultimate9 twin output loom provides plug-and-play fitment for the **included** 30" Light Bar, with industry-standard, waterproof DT connectors, and x1 additional Light Bar.

Additional Lighting

There is provision to mount a 26-inch Ultimate9 LED Light Bar on top of the nudge bar with laser-cut slots.

1. 26-inch LED Light Bar Provision
2. Number Plate Relocation Point

OPTIONAL LIGHTING

Generic image shown

Rocker Switch

An Ultimate9 etched small round rocker switch is included with the wiring harness assembly.

Fitment Notes

Requires a 19mm hole to be drilled in the dashboard for fitment.

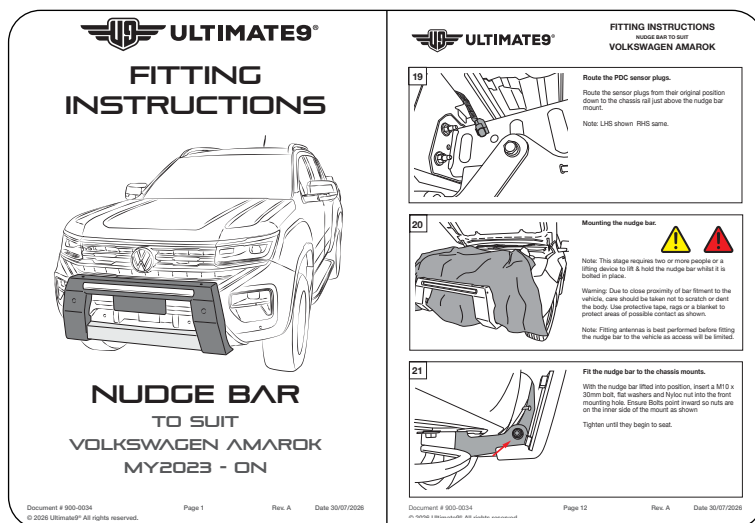

Fitment

Nudge bars include comprehensive step-by-step instructions to make fitment easy for both professional and DIY installers, containing visual diagrams for each step.

Fitment Notes

No permanent modifications are required.

Hardware

Nudge bar kits include stainless steel & zinc-plated high-tensile bolts, nuts and washers for installation.

Additional:

- PDC Sensor extensions, holders & blanking plates
- Slimline numberplate mounting bracket

Packaging

To ensure the nudge bar reaches the end customer in perfect condition, we use custom-designed boxes for each bar to prevent rubbing and transport damage.
