

Window Nets

We have designed our window nets to be vehicle specific and to meet the CCDA requirement for window nets

CCDA FWD Manual of Motor Sport Version 10.0 01-Mar-2013 pg22

“Whilst competing in Group B and Group C Events window nets are required to be fitted to the drivers and passengers’ window aperture.

The nets must cover at least 70% of the opening and be readily opened from the bottom or top, from inside and outside. The nets may be of the “string” variety with mesh size no greater than 50mm x 50mm.

The location of the net is optional and it may be fitted to the window frame so as not to inhibit egress”

When fitting the nets it’s important to fit the Velcro tabs in a way as they can be opened from the outside of the truck and the bungee cords can be reached by the occupants when seated and harnessed in the event of a roll over and should a marshal need to get you out.

We are committed to providing quality parts to you, our customer, so should you have any technical enquires or ‘how to’ questions please call us on 03 9720 8783 or email sales@the4wdshed.com
