DIFF DROP KIT

COMPATIBLE WITH

PX RANGER MK 1,2 & 3, EVEREST, RANGER RAPTOR,
MAZDA BT50 2012-2019

When lifting IFS vehicles, the CV Joints are put on an increased angle. This increased angle of the CV during vehicle operation can accelerate the wear on the joint, in addition to putting extra stress on the CV boots resulting in splitting and eventually premature wear of the CV. The Roadsafe Ranger Diff Drop Kit is suitable for Ford Ranger PX MK1/2 & 3 plus Mazda BT50 Gen II up to 2019. The Roadsafe Ranger Diff Drop Kit lowers the front diff by approx. 34mm in addition to moving the diff forward by 20mm, and includes a bonus 20mm Tail shaft Spacer to take up for this forward movement, reducing potential driveline vibration. The kit install does require a small modification being the removal of a Driver's side rear mount bracket on the driver's side, and is recommended for installation by a specialist 4WD mechanic. It is not a basic DIY fitment. Reinstallation of the bash plate will require additional spacers and/or modifications that are not included in the kit (bash plate brand dependent). The Roadsafe 4WD bash plate (BP036-1) will fit without modification.

**CONFIRMED
FITMENT**

Part Number DDRAN02V2

Diff Drop Kit compatible with PX Ranger MK 1,2 & 3,
Everest, Ranger RAPTOR, Mazda BT50 2012-2019
