

FITTING INSTRUCTIONS

VEHICLE Toyota Landcruiser 200 Series

PRODUCT Recovery Points
PART NUMBER RP-CRU200V3

ENSURE ALL SUPPLIED AND SPECIFIED COMPONENTS ARE USED DURING THE INSTALLATION OF TOW POINTS. FAILURE TO DO SO WILL SIGNIFICANTLY REDUCE THE WORKING LOAD LIMIT (WLL) SPECIFIED FOR EACH INDIVIDUAL POINT (5000KGS), WHICH CAN RESULT IN SERIOUS INJURY OR DEATH.

- 1. Remove any factory tie-down points.
- 2. Orient recovery points correctly and, using supplied bolts and washer plate, affix to vehicle.
- 3. Torque bolts to specification.

Bolt torque specs: M12x1.25 : 150 Nm

FITTING INSTRUCTIONS

VEHICLE Toyota Landcruiser 200 Series

PRODUCT Recovery Points
PART NUMBER RP-CRU200V3

NOTE: DURING RECOVERY ALWAYS USE BOTH RECOVERY POINTS.

The mounts themselves are sided, so please ensure installation to the correct side of the vehicle. In some circumstances. The RP-CRU70E have been designed to protrude through the aftermarket skid plate where one is installed. In some instances, depending upon the skid plate installed, you might need to trim two 100mm (long) x 40mm (wide) holes on each side to allow for the skid plate to be refitted. For the original Toyota undertray, two small notches need to be cut, as per images 3 and 4.
